Comment

Veterans Group Life Insurance (VGLI) is a program of post-separation insurance which allows Servicemembers to convert their SGLI coverage to renewable term insurance. Members with full-time SGLI coverage are eligible for VGLI upon release from service. VGLI is also available to Servicemembers transferring to the IRR (Individual Ready Reserves). However, a Servicemember's initial VGLI coverage amount cannot exceed the amount of SGLI they had in force (should that be enforced) at the time of separation from service. This process model depicts the method by which the VA reviews and awards claims submitted by the Beneficiary.

Task	Event	Gateway	Message	Subprocess
Start	Start	Start	Start	Start
Review Claim	Start	Start	Start	Start
Is Beneficiary eligible for payment?	Start	Start	Start	Start
Pay Beneficiary	Start	Start	Start	Start
Send Notice of Denial	Start	Start	Start	Start
End	End	End	End	End

Legend

- Start: The process begins at this point.
- End: The process ends at this point.
- Task: A task is represented by a rounded rectangle.
- Event: An event is represented by a circle.
- Gateway: A gateway is represented by a diamond.
- Message: A message is represented by a circle with a lightning bolt.
- Subprocess: A subprocess is represented by a rounded rectangle with a smaller rounded rectangle inside.

Subprocess

Subprocesses are used to represent a complex task that is further decomposed into a set of smaller tasks. The diagram shows a subprocess for 'Review Claim' which is further decomposed into a set of smaller tasks. The diagram shows a subprocess for 'Pay Beneficiary' which is further decomposed into a set of smaller tasks. The diagram shows a subprocess for 'Send Notice of Denial' which is further decomposed into a set of smaller tasks.
