

OneVA Enterprise Architecture September 2013 Release

Washington, D.C., September 2013 - The Department of Veterans Affairs' (VA) Office of Architecture, Strategy and Design will publish the next version of the OneVA Enterprise Architecture (OneVA EA) on September 30, 2013.

The OneVA EA is a comprehensive picture of VA's operations, capabilities and services, and the business and IT capabilities that serve them. This architecture is an evolving entity built on ongoing collaboration between each Administration's business and technology leaders, staff and stakeholders. As the Department evolves to meet change, the architecture also evolves. Each architecture Release is a response to serve a specific need as well as supporting a dynamic environment, and most importantly, move toward a more efficient steward of services for Veterans and beneficiaries.

The OneVA EA September 2013 Release offers numerous new and updated views and reports of architecture content that make up the OneVA Enterprise and will be available on the OneVA EA website located on both the Internet and Intranet.
