 Major Initiative (MI) Four:
 Virtual Lifetime Electronic Record (VLER) enables the Department of Veterans Affairs (VA) and its partners to proactively provide the full continuum of services and benefits to Veterans through Veteran-centric processes made possible by effective, efficient, and secure standards-based information sharing. VLER is a multi-faceted business and technology initiative that includes a portfolio of health, benefits, personnel, and administrative information sharing capabilities. It provides Veterans, Service members, caregivers, and service providers with a single source of information for health and benefits needs in a way that is secure and authorized by the Veteran or Service member.

Description: This is a view of the systems, services, and organizations that interface with VLER in the context of providing Veterans, Service members, caregivers, and service providers with a single source of information for health and benefits needs in a way that is secure and authorized by the Veteran or Service member. The primary systems and services with respect to the scope of VLER are internal systems, all other non-VA agencies, systems and services are considered external.

Portfolio/Division: Benefits
