Inpatient clinical services include those performed onsite once a Veteran is admitted to a VA medical center. Medical centers provide a wide range of services including traditional hospital-based services such as surgery, critical care, mental health, orthopedics, pharmacy, radiology, and physical therapy. In addition, most VA medical centers offer additional medical and surgical specialty services, including audiology and speech pathology, dermatology, dental, geriatrics, neurology, oncology, podiatry, prosthetics, urology, and vision care. Some medical centers also offer advanced services, such as organ transplants and plastic surgery. This process model outlines a generic stay at a VA medical center, from admission to discharge.
